LOS ANGELES'S FREE WEEKLY

You may never need to use the Yellow Pages again once you've hooked into Buy-Phone, an electronic compendium of more than 10,000 listings of services, consumer products, and entertainment. Tell the master computer by phone that you need Chinese food and Buy-Phone will transmit a list of restaurants and information concerning daily special and discount possibilities into your home computer. The only catch to this free service is that your personal computer must be equipped with a modem phone hookup—but why isn't it? Slackers, however, can take advantage of Buy-Phone at local computer stores or at the Royal Palace Westwood Hotel, 1052 Tiverton Ave. To have your product or service listed or to obtain more information, call 474-2220. The computer's personal number is 474-0270—*Jackie Teets*
